

# The Emerging Talent Package

## Module 1: Self-evaluation

You complete a career audit, using the materials I provide.

This will include asking you to review your skills, values, preferences and possible career options, including using a Myers Briggs tool.

## Module 2: Job hunting master class

You will be sent an online 'job hunting masterclass' to complete, which you can view at any time to suit you.

Using the knowledge gained, along with an accompanying worksheet, you will review your own CV, LinkedIn profile and network. If you don't currently have any of these things set up then don't worry, the masterclass will show you how.

## Module 3: Career Guidance

You will take part in a 60 min careers guidance session with me, where we will review all you have learnt from modules 1 and 2, provide additional support and answer any remaining questions you may have.

## Module 4: How to thrive at work

You will be sent an online 'how to thrive at work' masterclass to complete, which you can view at any time to suit you.

This covers topics like understanding culture, job descriptions, building confidence and working with others.

You will then have a final 60 min session with me, where we review this and your plans for the future. We will explore how you 'coach yourself' going forward and design an action plan for your next steps.

**All of this for the small  
investment of £300**
